

BATTERY Ni-MH - 12V 2,2 Ah

This new type of battery complies with the applicable new specifications regarding the protection of the environment .

It provides the user with two key features, namely :

- absence of memory effect in that it may be fully recharged even after periods of scarce use
- improved autonomy thanks to its true 2.2 Ah capacity

Suitable for our tools SERTIMOS 55A and SERTIMOS 120U, PICOUP-2 and PICOUP-3 .

REFERENCE: **BATTERIE12V002** .

IMPORTANT: This type of battery must absolutely be charged with our matching 220V-50Hz charger bearing the reference CHARGEUR-220/12 or with our charger on vehicle bearing the reference CHARGEUR-220/12-1 shown herebelow .

CHARGER ON VEHICLE

This charger is compatible with our batteries Cd-Ni of the old **RED** model, ref BATTERIE12V0001, as well as with our batteries Ni-MH of the new **BLACK** model, ref BATTERIE12V003 .

The charger is connected by means of its cord the end plug which must be inserted into the cigar lighter socket of a car or truck equipped with 12 V batteries .

Reference: **CHARGER-12/12-1**.
