

Cover protection - behavior 1000A/1s

- protection of the tools in edges of the excavations
- serves for covering accessories in prevention from the risk of strain.

A note « **attentiveness and safety** » from Security Department of EDF, stipulates that:
“The risk of strain of accessories near operators working in excavations is known, and events of this type are regrettably notices.
To prevent this risk, measures exist and are imperative. Here below is a reminder in the preparation of the work :
Put out tension the works near immediate, every time is possible ; decrease the intensity in cables near in covering the visible or not visible accessories with a nitril flame-barrier”

SPECIFICATIONS :

Elastomer : nitril

Color : black

Density : 1.35+-0.1Kd/dm3

Hardness DIDC: 65+-7degrees

Resistance of break : (Rr)5 Mpa

Elongation of break : 200%

Temperature of use : -20/+100° C

Reference	Designation
TAPISPICOUP	PROTECTIVE NITRIL CARPET 70 x 100
TAPISNIT.140.300	PROTECTIVE NITRIL CARPET 140 x 300
